

## INTRODUCTION

This detailed ACTION PLAN completes the final element of the Parish Plan which was initiated by the Parish Council in 2003. This Action Plan was adopted by the Parish Council at their meeting on 4 September 2006.

Both for ease of reference and simplicity it is divided into three main sections. They are as follows:-

**A. The Environment**

This includes Actions A1 to A18 and is highlighted in GREEN

**B. Education, Work & Retirement**

This includes Actions B1 to B10 and is highlighted in BLUE

**C. Quality of Life**

This includes Actions C1 to C14 and is highlighted in RED

Each section is divided into three columns; with column one showing details of the proposed Action, column two listing those responsible for taking specific action, and column three giving an indication of the time-frame during which the Action should occur.

It is expected that the Action Plan will be amended over time as new priorities emerge. It should therefore be regarded as a framework for the future which can be updated continually.

The implementation of the Action Plan will be monitored by the Steering Group who will report to the Parish Council on a regular basis.

# VILLAGE DESIGN STATEMENT

With the support of the Parish Council and the Countryside Agency the Steering Group is now starting work on a Village Design Statement for the whole Parish.

The Principles of Village Design Statements as defined by the Countryside Agency are:

- Village Design Statements are produced by communities to identify local character and set out design guidance to help guide new development
- Statements describe the qualities that residents value in their village and its surroundings
- The statement is an advisory document produced by the village community which can help effect and influence how any new building fits into the village
- It is intended that the document should influence the operation of the planning system so that new development is in harmony with the setting and makes a positive contribution to the immediate environment.

The recommendation of the Parish Plan Steering Group to the Parish Council as to the timescale for the implementation of the Action Plan is shown as being:-

**SHORT** These items should be actioned and in place during the years 2006-2008

**MEDIUM** These items should be actioned and in place during the years 2008-2010

**LONG** These items should be actioned and in place during the years 2010-2012

**ON-GOING** These items are current practice and should be continued

The timescale for implementation is colour-coded on the right hand side of the page: short term is shown in the deepest colour, medium term is lighter, etc.
